

This listing of claims will replace all prior versions, and listings, of claims in the application:

The Status of the Claims

1. (Cancelled)

2. (Currently Amended) An apparatus as defined in claim [H] 6 wherein the at least one connector couples the play gym to the mat when the mat is removed from the play yard and the bassinnet.

3. (Currently Amended) An apparatus as defined in claim 6 comprising:

_____ a floor mat;

_____ a play gym to suspend an object above the floor mat;

_____ at least one connector to secure the play gym to the floor mat,

the at least one connector comprising at least one non-pivoting connector located within a perimeter of the floor mat and accessible from a top of the floor mat; and

_____ at least one fastener to couple the floor mat to at least one of a play yard and a bassinnet, wherein the at least one connector couples the play gym to the mat when the mat is located within at least one of the play yard and the bassinnet.

4. (Original) An apparatus as defined in claim 3 wherein the
at least one connector directly couples the play gym to the mat.

5. (Cancelled)

6. (Previously Presented) An apparatus comprising:
a floor mat;
a play gym to suspend an object above the floor mat;
at least one connector to couple the play gym to the floor mat;
and
at least one fastener to couple the floor mat to at least one of a
play yard and a bassinet, wherein the at least one connector comprises a
plurality of connectors, and the play gym comprises:
a hub; and
at least two legs, each of the legs having a first end
coupled to the hub and a second end dimensioned to be removably coupled to
a respective one of the connectors, wherein the at least two legs are pivotably
coupled to the hub.

7. (Original) An apparatus as defined in claim 6 wherein the
hub defines a first plurality of cavities and a second plurality of cavities,
wherein each of the at least two legs is pivotable between a first position in
which the first end is disposed within a respective one of the first cavities and
a second position in which the first end is disposed within a respective one of

the second cavities.

8. (Original) An apparatus as defined in claim 7 wherein the hub includes a plurality of pins and the first ends of the at least two legs define a slot to receive a respective one of the pins.

9. (Original) An apparatus as defined in claim 8 further comprising a plurality of springs positioned to respectively bias the at least two legs toward the hub.

10. (Original) An apparatus as defined in claim 9 wherein the springs bias corresponding ones of the at least two legs into at least one of: (a) one of the first cavities and (b) one of the second cavities.

11. (Original) An apparatus as defined in claim 9 wherein at least one of the at least two legs must be moved along its longitudinal axis and against a spring force of a corresponding one of the springs to pivot the at least one of the legs between the first and second positions.

12. (Currently Amended) An apparatus as defined in claim [[5]] 6 wherein the at least two legs are flexible.

13. (Currently Amended) An apparatus as defined in claim [[4]] 6 further comprising the at least one of the play yard and the bassinet, wherein at least one of the at least one of the play yard and the bassinet includes

connectors to removably couple the play gym to the at least one of the play yard and the bassinet such that the play gym suspends the object above the at least one of the play yard and the bassinet.

14. (Original) An apparatus as defined in claim 13 wherein the connectors of the at least one of the play yard and the bassinet comprise pockets to receive ends of the play gym.

15. (Original) An apparatus as defined in claim 14 wherein the pockets comprise fabric pockets.

16. (Currently Amended) An apparatus as defined in claim ~~[[5]]~~ 6 wherein at least one of the connectors defines a slot to receive the second end of a leg of the play gym.

17. (Cancelled)

18. (Currently Amended) An apparatus as defined in claim ~~[[4]]~~ 6 wherein the at least one connector is located in a top surface of the mat.

19. (Currently Amended) An apparatus as defined in claim ~~[[4]]~~ 6 wherein the at least one connector is located within a perimeter of the mat and is not pivotably coupled to the mat.

20. (Cancelled)

21. (Currently Amended) An apparatus as defined in claim [[23]] 6 wherein the mat comprises a padded board.

22. (Currently Amended) An apparatus as defined in claim [[23]] 6 wherein the connectors are pivotably coupled to the mat.

23. (Currently Amended) An apparatus as defined in claim 6 comprising: ~~a mat; a~~ wherein the plurality of connectors are coupled to the mat to be moved between a first position within a perimeter of the mat and a second position outside the perimeter of the mat; and

~~a play gym to be removably coupled to the connectors to suspend an object above the mat~~ wherein, when the connectors are placed in the first position, the mat is positionable within at least one of a play yard and a bassinet as a floor of the at least one of the play yard and the bassinet.

24. (Cancelled)

25. (Cancelled)

26. (Cancelled)

27. (Cancelled)

28. (Cancelled)

29. (Cancelled)

30. (Previously Presented) An apparatus comprising:

a hub; and

at least two legs, each of the legs having a first end coupled to the hub and a second end dimensioned to be removably coupled to: (a) at least one of a bassinet and a play yard, and (b) a floor mat separate from the bassinet and the play yard, wherein the hub defines a first plurality of cavities and a second plurality of cavities, wherein each of the at least two legs is pivotable between a first position in which the first end is disposed within a respective one of the first cavities and a second position in which the first end is disposed within a respective one of the second cavities.

31. (Original) An apparatus as defined in claim 30 wherein the hub includes a plurality of pins and the first ends of the at least two legs define a slot to receive a respective one of the pins.

32. (Original) An apparatus as defined in claim 31 further comprising a plurality of springs positioned to respectively bias the at least two legs toward the hub.

33. (Original) An apparatus as defined in claim 32 wherein the springs bias corresponding ones of the at least two legs into engagement with

at least one of: (a) one of the first cavities and (b) one of the second cavities.

34. (Original) An apparatus as defined in claim 32 wherein at least one of the at least two legs must be moved along its longitudinal axis and against a spring force of a corresponding one of the springs to pivot the at least one of the legs between the first and second positions.

35. (Currently Amended) An apparatus as defined in claim 6 comprising:
_____ a hub; and
_____ at least two legs, each of the legs having a first end coupled to the hub and a second end dimensioned to be removably coupled to: (a) at least one of a bassinet and a play yard, and (b) a floor mat of the at least one of the bassinet and the play yard when the floor mat is separate from the at least one of the bassinet and the play yard, wherein the at least two legs are flexible and are biased away from a center of the floor mat when the legs are coupled to the floor mat.

36. (Cancelled)

37. (Cancelled)

38. (Cancelled)

39. (Previously Presented) A method comprising:

securing a play gym at least partially above at least one of a bassinet and a play yard;

removing the play gym from the at least one of the bassinet and the play yard;

securing the play gym to a mat apart from the play gym and the bassinet;

removing the play gym from the mat; and

collapsing the play gym, wherein collapsing the play gym comprises:

pulling a leg of the play gym in a direction away from a hub; and

pivoting the leg into a stored position.

40. (Original) A method as defined in claim 39 wherein pulling the leg of the play gym comprises pulling the leg of the play gym against a spring force.

41. (Original) A method as defined in claim 39 further comprising moving the leg of the play gym toward the hub to secure the leg in the stored position.

42. (Original) A method as defined in claim 41 wherein moving the leg toward the hub comprises moving the leg toward the hub under the influence of a spring force.

43. (Cancelled)

44. (Cancelled)

45. (Cancelled)

46. (Cancelled)

47. (Original) An apparatus as defined in claim 7 wherein, when the at least two legs are in the second positions, the first ends are not disposed in the respective ones of the first cavities.

48. (Original) An apparatus as defined in claim 30 wherein, when the at least two legs are in the second positions, the first ends are not disposed in the respective ones of the first cavities.
